Where there are no prices stock is very scarce. Please write. Some may be available.

**TERMS:** Cash with order.

Shipment usually by postpaid express.

No charge for packing.

**EXTRA LILACS:** On orders of \$10 to \$25, we will add lilacs of your choice equal in value to 10% of your order; On orders of \$25 to \$50 a value equal to 15% of your order; On orders of more than \$50, a value of 20% of your order.

We take great care to have lilacs true to name. We never substitute unless the customer so advises.

No liability is assumed beyond the amount of the purchase price. All orders are well packed and should arrive in good condition. We do not assume responsibility for growth where conditions are beyond our control.

Lilacs are easy to grow. They will do well for you with a small amount of proper care if they are planted properly in a good location with fairly good soil. Do not let them bloom the first year. The bloom will be disappointing. It will be small and the color not true. The lilac is putting in all its effort to become established in a new place and get over the shock of moving.

### **LILAC COLORS**

Color of lilacs is very difficult to describe. It changes with the light and dark days, morning, evening and noon-day sun, and as it opens and ages. One will open lilac-blue and turn pink, another will open pink and turn blue. One will have three distinct colors, and another three shades of the same hue. The half open trusses are usually vari-colored, changing and attractive. All are pinker and more glowing in the setting sun. All colors are opaque, and all greyed by the indigenous lilac color.

**LARGE SPECIMEN LILACS AVAILABLE.**

Prices on request.
